EXAMINER

HOFFMANN, JOHN M

ART UNIT	PAPER NUMBER
----------	--------------

1731

DATE MAILED: 09/04/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>	
	09/555,993	ALLEN ET AL.	
	<b>Examiner</b>	<b>Art Unit</b>	
	John Hoffmann	1731	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 30 June 2003.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-16 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-16 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on \_\_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.  
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

### Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a) ☐ All b) ☐ Some \* c) ☐ None of:  
1. ☐ Certified copies of the priority documents have been received.  
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).  
\* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).  
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

***Response to Arguments***

Applicant's arguments filed 6/ have been fully considered but they are not persuasive.

It is argued that Harding does not teach maintaining constant preform downfeed rate. (or at least for the entire process) This is largely irrelevant because the present claims do not require this. 1) Present claims 8 and 9 state that the downfeed rate decreases/increases. 2) The last two lines of claim 1 merely indicate that the draw rate is varied to maintain a constant fiber diameter while maintaining the downfeed rate constant. This does not state that varying is while the rate is constant, rather it is varied with the intended function of keeping the fiber diameter constant when the downfeed rate is constant. In other words, the phrase "while maintaining" modifies the "to maintain", and not the "varying". The intended function "to maintain" does not require that any of it actually happens. 3) it would be improper for the Office to interpret the claims as precluding no varying of the downfeed rate - because that would then permit someone to practice the essence of Applicant's invention simply by having a nominal varying of the downfeed rate. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re*

*Otto*, 136 USPQ 458, 459 (CCPA 1963). The claimed intended use does not result in a manipulative difference as compared to the prior art.

Re claim 11 it is argued that a determination (is?) made as to whether or not the sensed draw rate is within a zone (range?). Examiner could not find any step of "determining" anything. There is a step of sensing the draw rate for the intended function "to determine if it is within a range" - but this does not set forth that one must actually determine if it is within the range. Alternatively, the predetermine range is the range of possible speeds would be inherently predetermined by the starting materials, power capacity of the apparatus, etc. As an extreme example, one inherently predetermined range would be the range predetermined by the laws of physics as set forth in Albert Einstein's Theory of Special Relativity (i.e. between 0 and the speed of light). A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). The claimed intended use does not result in a manipulative difference as compared to the prior art.

Art Unit: 1731

It is further argued that Harding does not teach a predetermined zone. There is no claim limitation that would require that there be a predetermined zone be disclosed by Harding.

It is still further argued that claim 11 requires a determination as to whether or not the sensed draw range is within a "zone" (sic) of predetermined speed. Examiner could find no mention of a "zone of predetermined speed." If this is in reference to the last line of claim 11, such is not convincing. This last line only requires that there be varying if the rate is outside the range. Since Harding's drawing is never outside the range of possible Harding drawing speeds, it does not require any additional varying.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
